

# The 9/11 Commission Report is 'Fatally Flawed'

*The 9/11 Commission Report* is "fatally flawed" says Enver Masud, president of The Wisdom Fund—twf.org. "Its detailed outline was prepared before the commission barely got started."

Enver, an engineer, managed the *National Power Grid Study*, and the *National Electric Reliability Study* for the U.S. Department of Energy. A consultant to the U.S. Agency for International Development, and the World Bank, Enver has advised the governments of Indonesia, Pakistan, Russia, and other countries.

Enver's critique of *The 9/11 Commission Report* is available at The Wisdom Fund website—twf.org/911.html. During his 3-week, 9/11 lecture tour of South Africa, the U.S. embassy in Johannesburg declined an invitation from SAfm to rebut Enver.

Enver's new book, *9/11 UNVEILED*, is an 80-page distillation of six years of intermittent research into the tragic events of September 11, 2001. Excerpts follow:

## Bin Laden

Bin Laden, in a September 28, 2001 interview with the Pakistani newspaper *Ummat*, is reported to have said: "I have already said that I am not involved in the 11 September attacks in the United States..."

Experts dismiss the video tape "discovered in a private home in Jalalabad, Afghanistan" which allegedly shows Bin Laden confessing to the September 11 attacks...

In a December 20, 2001 broadcast by German TV channel *Das Erste* "two independent translators and an expert on oriental studies found the White House's translation not only to be inaccurate, but manipulative."

In a radio interview with Kevin Barrett, Prof. Bruce Lawrence, editor of *Messages to the World: The Statements of Osama bin Laden*, called the video "bogus."

As of July 2008, the FBI's *Most Wanted Terrorists* web page makes no reference to Bin Laden being wanted for the September 11, 2001 attacks on the World Trade Center and the Pentagon.

## The 'Hijackers'

On September 23, 2001 BBC News reported that four of the hijack "suspects"—Waleed Al Shehri, Abdulaziz Al Omari, Saeed Alghamdi, and possibly Khalid Al Midhar were—alive, and Director Mueller acknowledged "that the identity of several of the suicide hijackers is in doubt."

...There were no Arab names on [the passenger] lists!

## 1, 2 World Trade Center

Two World Trade Center, the South Tower, collapsed at 9:59 a.m. One World Trade Center, the North Tower, collapsed at 10:28 a.m. At 10:03 a.m., CNN reported: "THIRD EXPLOSION SHATTERS WORLD

TRADE CENTER IN NEW YORK". At 10:06 a.m., CNN reported: "THIRD EXPLOSION COLLAPSES WORLD TRADE CENTER IN NEW YORK".

According to U.S. government reports, aircraft impact would not have caused the Twin Towers to collapse...

NIST's analysis ends with the "initiation of collapse." NIST admits that "it did not analyze the collapse of the towers..."

Among those who testified to explosions at the 9/11 Commission hearings was William Rodriguez, "honored by the White House" for his rescue efforts...

Leslie Robertson, structural engineer responsible for the design of the World Trade Center, is reported to have said at the National Conference of Structural Engineers on October 5, 2001: "As of 21 days after the attack, the fires were still burning, and molten steel was still running."

## 7 World Trade Center

Diane Sawyer, an award-winning investigative journalist, interviewed a firefighter on ABC News Live who said: "At Building 7 there was no fire there whatsoever, but there was one truck putting water on the building, but it collapsed completely..."

Dan Rather, at the time anchor and managing editor of the *CBS Evening News*, while reporting on the collapse of Building 7, said: "For the third time today, it's reminiscent of those pictures we've all seen too much on television before. A building was deliberately destroyed by well placed dynamite to knock it down."

Indira Singh, a first responder on September 11, said during an appearance on KPFA that by "noon or one o'clock", the Fire Depart-

ment was telling them that they had to move the triage site because "we're going to have to bring it down..."

The collapse of [47-story] Building 7 is unprecedented.

No steel-frame, high-rise building has collapsed from fire, either before September 11, 2001 or after September 11, 2001.

## The Achilles Heel

...the collapse time, i.e. the time from the initiation of collapse to the total collapse of One and Two World Trade Center, and 7 World Trade Center, is the Achilles' heel of the official 9/11 [story].

## Flight 93

NBC Reporter: "The debris here is spread over a 3 to 4 mile radius which has now been completely sealed off, and is being treated according to the FBI as a crime scene. This is one of those cases where the pictures really do tell the story...one of the most horrifying aspects of this is how little debris is visible...that's all you see, just a large crater in the ground, and just tiny, tiny bits of debris...the investigators out there, and there are hundreds of them, have found nothing larger than a phone book."

...two low-altitude calls from Flight 93 were, according to the FBI report, the only cell phone calls made from all four flights.

## The Pentagon

There is little if any hard evidence, available to the public, that American Airlines Flight 77, a Boeing 757 flying from Washington Dulles International Airport, crashed into the Pentagon on September 11, 2001.

At the Dept. of Defense (DoD) News Briefing on September 12, 2001, American Airlines, Flight 77, Boeing, Dulles, and passengers were not mentioned.

Standing in front of the Pentagon on September 11, 2001, Jamie McIntyre, CNN's senior Pentagon correspondent since November 1992, reported: "From my close up inspection there's no evidence of a plane having crashed anywhere near the Pentagon...The only pieces left that you can see are small enough that you could pick up in your hand. There are no large tail sections, wing sections, fuselage—nothing like that anywhere around which would indicate that the entire plane crashed into the side of the Pentagon."
