The Honorable Pete King
United States House of Representatives
339 Cannon House Office Building
Washington, D.C. 20515-3203

Dear Rep. King:

We support your call for an inquiry into Muslim “radicalization” provided it is fair, open, and addresses its real causes.

The enclosed book *9/11 Unveiled* is an Executive Summary of several years of research, and shows that much of what we’ve been told about that tragic September 11, 2001 is false. I had the pleasure of presenting this book to Iran’s President Ahmadinejad at a dinner for Muslim leaders on September 20, 2010.

My varied work experience has taught me how to sift through complex, conflicting facts and opinions to arrive at defensible conclusions. I challenge the 9/11 Commission to defend theirs.

I managed the National Power Grid Study (directed a couple of dozen, multidisciplinary teams — total 150 persons), and the National Electric Reliability Study for the U.S. Department of Energy. I also set up and directed the Operations Review Division at the Iowa Commerce Commission. I’ve consulted for the U.S. Agency for International Development, and the World Bank — in Albania, Egypt, Ethiopia, Ghana, Indonesia, Latvia, Pakistan, Russia, and Tanzania.

I was recently on a three week lecture tour of South Africa speaking before hundreds every day, interviews on radio and television, etc. Virtually all who listened came away sharing my conclusions. The U.S. embassy declined an invitation from SAfm to rebut me.

Should you have questions, please call me on 202-xxx-xxxx.

Sincerely,

Enver Masud
