

9/11 PENTAGON BOB PUGH'S PHOTOS

Professional photographer Bob Pugh: "In my video I show a clear view of the hole minutes before the collapse. It was shot about 50 yards from the building using the zoom on my camera. There is a bright yellow fire truck parked in front of the hole spraying foam on the fire. **From my vantage point the hole looks like it might be large enough for the fire truck to barely drive through.** From that I make the assumption that the hole measures 16 feet more or less."

CNN's senior Pentagon correspondent: "From my close up inspection there's no evidence of a plane having crashed anywhere near the Pentagon. . . . **The only pieces left that you can see are small enough that you could pick up in your hand.** There are no large tail sections, wing sections, fuselage — nothing like that anywhere around which would indicate that the entire plane crashed into the side of the Pentagon."

Bob Pugh's photos prove that the official account of what happened at the Pentagon on September 11, 2001 is false. Examine Bob Pugh's photos taken before the collapse of the Pentagon roof.

9/11 UNVEILED: THE GREAT COVER-UP?

9/11 UNVEILED — free ebook summarizes 8 years research — ONE hour read, LINKS to evidence. Paperback at Amazon.com. Comic strip AI generated.
